SCRIPT Program

# SCRIPT Program - Projects In-Flight

## SCRIPT Projects for the new Consolidated Planning Process (CPP)

- Policy and Process Projects
  - CPP Phase 1 – Transition Study and Implementation
  - CPP Phase 2 – Transmission Services Large Load Additions
  - Planning Process Improvements – member recommendations to analyze and/or implement
- Automation Effort Projects
  - Engineering Applications – internal tools to speed up processes
  - Pre-screening Tools Implementation
    - Load Hosting Capacity Tool – data on load hosting capacity

# Automation updates

## What Members Can Expect

### Load Hosting Capacity Tool (LHCT)

- LHCT Overview
  - A pre-screening tool for load interconnections (DC and ACCC analysis + ACCC on CONs).
  - Meets requirements for HITT T3-2 and the CPP for SCRIPT.
- SPP Board – Passed the Revision Request at May 2026 meeting
- Data is currently available for Transmission Owners (TO's) and Transmission Customers (TC's) for load requests
  - Request through RMS
  - Data provided in files through Globalscape
- Future: User Interface tool development has started
  - For use by TO's and TC's. User's must have NDA
  - Expect member testing and go-live in Q4 2026
  - Member testing dates coming soon

# Automation updates

## What Members Can Expect

### Load Hosting Capacity Tool (LHCT)

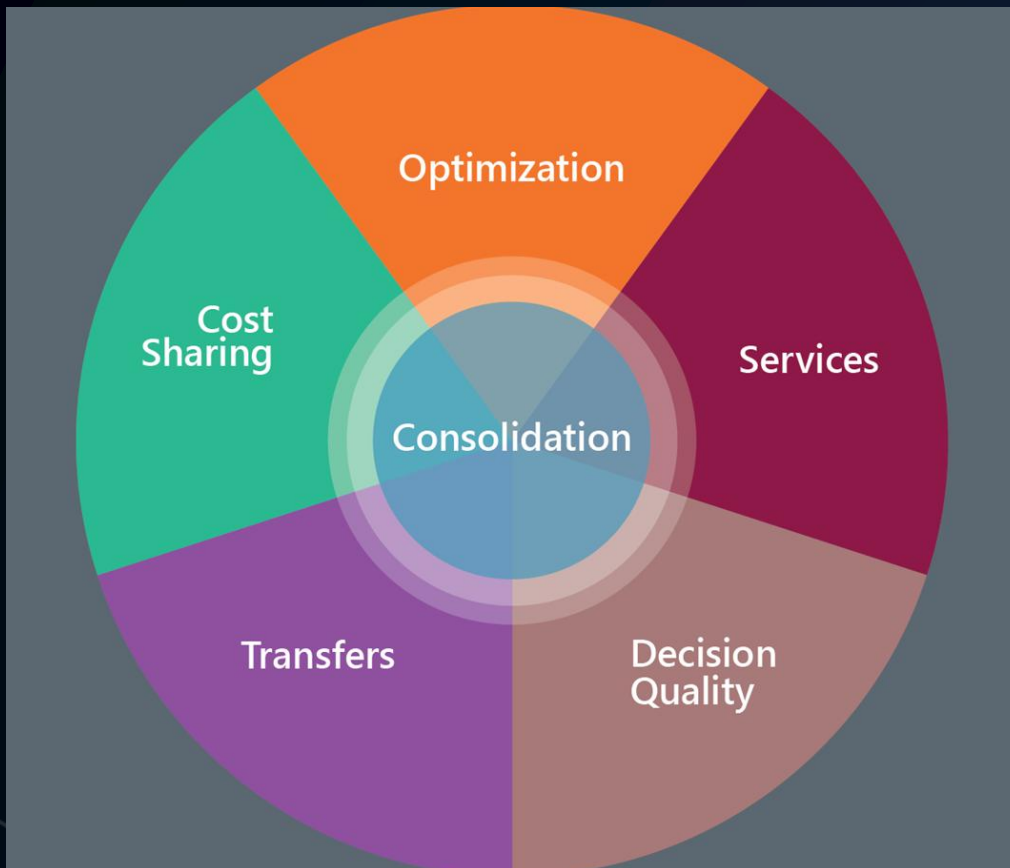

- LHCT Overview
  - A pre-screening tool for load interconnections (DC and ACCC analysis + ACCC on CONs).
  - Meets requirements for HITT T3-2 and the CPP for SCRIPT.
- SPP Board – Passed the Revision Request at May 2026 meeting
- Next Step: User Interface tool developed on SPP Portal
  - For use by Transmission Owners (TO's) and Transmission Customers (TC's). Users must have NDA
  - Expect member testing and go-live in Q4 2026
- Interim Plan prior to Go-Live:
  - FERC filing in Q2 or early Q3
  - Once FERC response is received (if approved):
    - TO's and TC's will be able to request data through RMS
    - Data provided in files through Globalscape until UI is live

# Stakeholder Impacts and Information

## What Members Can Expect

|                       |                                                                                                                                                                                                                 |
|-----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Member Impacts        | <ul style="list-style-type: none"><li>• Load Hosting Capacity data will be available to TO's and TC's with NDA's in place after FERC response is received.</li></ul>                                            |
| Needed from Members   | <ul style="list-style-type: none"><li>• Plan for LHCT member testing in Q4 2026 – exact dates to be provided in June</li></ul>                                                                                  |
| Stakeholder Resources | <ul style="list-style-type: none"><li>• Member Impacting Project Overview (MIPO) <a href="#">Version 5</a> for the SCRIPT Program.</li><li>• MIPO Version 6 coming in June with LHCT section updates.</li></ul> |
